

Twenty Russian Companies receive the award «Russian Nanotechnology Product»

December 03, 2015

Twenty Russian innovative companies are awarded the symbol “Russian Nanotechnology Product” which certifies product quality and safety, and also the fact the product is produced with nanotechnology. The award ceremony was held in Moscow within the framework of IV Congress of nanotechnology companies.

Anatoly Chubais, the Chairman of the Management Committee of “ROSNANO” and Aleksey Abramov, the Head of Rosstandard bestowed the symbol diploma to companies’ representatives.

In 2013, during the II Congress of Nano Industry Companies, the Fund of Infrastructural and Educational Programs of ROSNANO and ROSSTANDARD came up with the initiative to create a special identifying symbol for the national innovation products produced with Nano technology. Companies with enthusiasm supported this initiative and the following year, during the III Congress, 24 Russian companies were awarded the symbol.

This year, 20 more companies earned the right to be awarded the symbol. The companies’ profiles include manufacturing of construction materials, solar batteries, polymers and composite materials, and many other products. Moscow IMET presenting Nano cement technology is among those exclusive twenty companies.

The symbol “Russian Nanotechnology Product” is awarded to products, manufactures inside the Russian Federation from local raw materials. Besides that, the product has to comply with safety requirements for humans and environment and have documents confirming no violation of intellectual property rights.

Every manufacturer, claiming the right to use the symbol «Russian Nanotechnology Products», submitted the proper set of documents, certifying the quality and safety of it’s product received an opportunity for free of charge expert evaluation and analysis of their products. The evaluation experts from the appropriate innovative industry field conduct independent state analysis and evaluation of a product to comply with requirements of awarding the symbol. The decision to award the symbol is then made by a special Commission made with representatives of the Fund of Infrastructural and Educational Programs of ROSNANO and ROSSTANDARD, experts from ROSSTANDARD and Environmental Authorities. Upon the award receipt, a company may exercise the right to use its product for commercial purposes.
